TOUCHMARK EXPANDS SERVICES WITH CATHETER TIP FORMING

HAYWARD, CA APRIL 25, 2010 - TouchMark, a division of Delphon Industries and industry leader in Medical Device Pad Printing, announced today that it will expand its services to include catheter tip forming. Medical device manufacturers will now be able to rely on TouchMark's in-house production and advanced die design technologies for their catheter tip forming projects.

"The addition of tip forming to TouchMark's host of services allows us to provide a more turn-key solution to our medical device manufacturing customers," says Ramund Abiera, TouchMark Sales Manager. The company is able to work with virtually any substrate including polyurethane, polyethylene, PEBAX, PTFE, PVC, polypropylene, PEEK, and FEP to create tips for IV catheters, sheaths, and dialators.

Background:

~ MORE ~

TouchMark, originally founded in 1992, was purchased by Delphon Industries in 2006. For more than 15 years the company has worked closely with leading electronics and medical customers to provide solutions to their pad printing challenges. TouchMark has developed an expertise with difficult substrates, inks and unique shapes. In addition to pad printing, the company has expanded its offerings over the years to include material procurement and preparation, incoming inspection, Cleanroom assembly, as well as post production services. The company is constantly growing its service menu to meet the changing needs of medical device and consumer electronic manufactures.
